UI Components Designing & Application Interface Coding

- Identified **web-based user interactions** and developed highly-responsive user interface components via **React concepts**
- Translated **designs & wireframes** into high-quality **code** and wrote application **interface code** via JavaScript following **React.js workflows**

Code Debugging & Front-end Architecture

- Troubleshoot **interface software** and **debugged application codes** to improve functionality and performance.
- Developed and implemented **front-end architecture** to support user interface concepts with **100% accuracy**

Performance Optimization & Features Development

- Monitored and improved **front-end performance** and documented application changes & worked on **updates**
- Developed the **latest user-facing features** using React.js and built reusable components & **front-end libraries** for future use
- Optimized components for **maximum performance** across a vast array of web-capable **devices and browsers**

Application Development & UI Designing

- Coordinated with the development team of 6 to discuss **user interface ideas** and **applications**
- Reviewed **application requirements** and **interface designs** to ensure compatibility with **existing applications**
